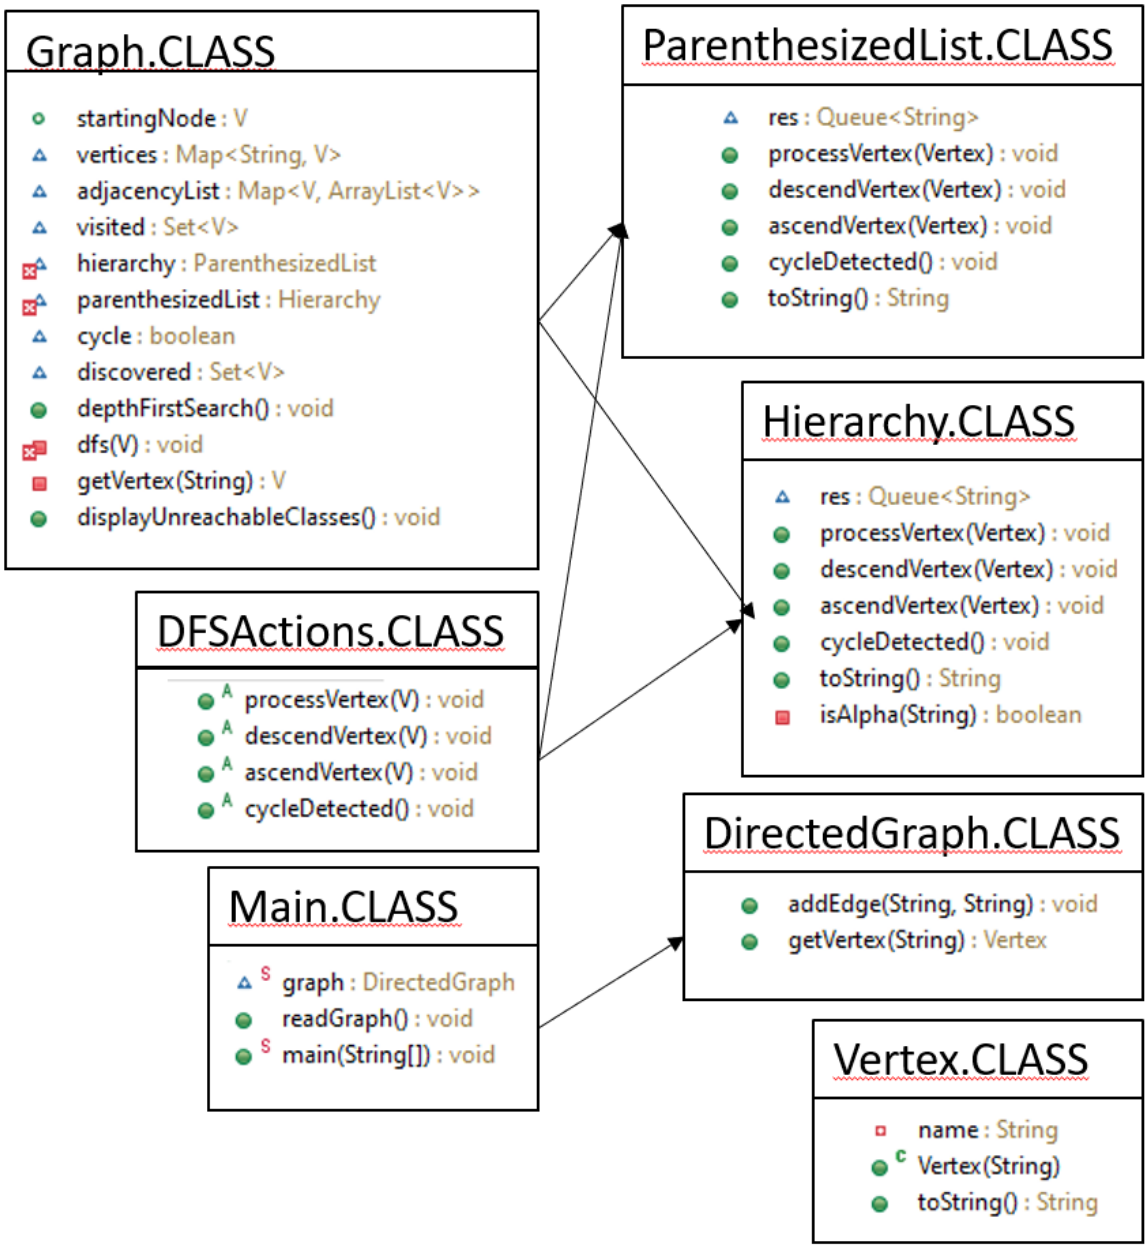
Project 4

UML Class Diagram



#	Input	Expected Output	Actual Output	Pass?
1	ClassA ClassC ClassE ClassJ ClassB ClassD ClassG ClassC ClassA ClassE ClassB ClassF ClassH ClassJ ClassB ClassI ClassC	ClassA ClassC ClassE ClassB ClassD ClassG ClassF ClassH ClassJ ClassB ClassD ClassG		YES (Expected Output was wrong)
2	ClassA ClassB ClassC ClassD ClassB ClassE ClassF ClassC ClassG ClassD ClassH ClassI ClassJ ClassE ClassK ClassG ClassL	ClassA ClassB ClassE ClassK ClassF ClassC ClassG ClassL ClassD ClassH ClassI ClassJ		YES
3	ClassA ClassF ClassC ClassB ClassG ClassF ClassC ClassI ClassD ClassJ ClassE ClassK	ClassA ClassF ClassC ClassI ClassB is unreachable ClassG is unreachable ClassE is unreachable ClassK is unreachable ClassD is unreachable ClassJ is unreachable		YES

This final project, although tough for me, is one of the more useful Java projects I have completed. This can be used for creating outlines of categories and sub-categories from a simple text file.
